## REMARKS

The figures of births and deaths shown in this statement for week ending the 2nd June 1956 relate to 204 towns with an estimated population of 29455 thousands. The total number of towns is 317, and their population is 41,516 thousands. Thus 64% of the total number of towns representing 71% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,470 and 7,383 representing birth and death rates of 29.1 and 13.0 per thousand of population respectively.

(a) *States (Part A and C)* :—The data here relate to 158 towns with an estimated population of 22,847 thousands. Information about Andhra and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 63% of the total number of towns representing 68% of the total population is covered. The number of births

and deaths recorded in these towns were 13,473 and 6,027 representing birth rates and death rates of 30.7 and 13.7 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B)* :—The data here relate to 46 towns with an estimated population of 6,608 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 71% of the total number of towns representing 82% of the total population is covered. The number of births and deaths recorded in these towns were 2,997 and 1,356 representing birth and death rates of 23.6 and 10.7 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
